ANNUAL OPERATING BUDGET IMPACT (\$000)

DESCRIPTION

This project provides for the rehabilitation and/or renovation of park roads and associated bridges. Park roads are roadways which serve as public transportation routes in stream valley parks, e.g., Sligo Creek Parkway, Beach Drive, Little Falls Parkway, etc. Park bridges are vehicular bridges owned by M-NCPPC and identified in the periodic bridge inspection report prepared by the Montgomery County Department of Public Works and Transportation (DPWT). There are approximately 14 miles of park roads and 13 associated bridges within the park system. The program includes pavement renovation, drainage improvements, structural and nonstructural bridge repairs and guard rail replacement. Projects will resurface portions of Beach Drive, Sligo Creek Parkway, Carderock Springs Drive, and Elmhurst Parkway.

JUSTIFICATION

Safety and planned maintenance. Generally park roads should be resurfaced every 12 years based on condition and safety factors and park bridges should be repaired per DPWT's biennial inspection reports.

Plans and Studies

DPWT's biennial inspection reports. Park road conditions have been evaluated according to DPWT's Pavement Surface Condition Rating Manual.

OTHER

This project was previously managed by the M-NCPPC through its Resurfacing Park Roads and Bridge Improvements project. Transfer to DPWT leverages the functional, technical, and contracting expertise within DPWT to provide the most efficient and economical infrastructure support.

* Expenditures will continue indefinitely.

APPROPRIATION AND EXPENDITURE DATA

Date First Appropriation	FY07	(\$000)
